Problem-solving, Teamwork

PROJECT DETAILS

• Hangoo app — June-2021 - September-2021

Project Description: Hangoo is a dating app that is based on voice messages. People would swipe right or left based on sound of your voice. After you match with the person, you could see their images.
Responsibilities: I worked closely with CEO to improve application design and features. I also found 2 more developers that would later help in the process of development. Implemented chat using voice messages only. In short, me and one more iOS dev built the whole app fro
Technologies: Swift, MVP, Coordinators
Industry: Services

• Artisa — June-2018 - September-2019

Project Description: Artisa is a big smart-home project where investors are building smart apartment complexes. Every apartment was equiped with SmartLocks, auto blinds on widows, LED smart light, etc.
Responsibilities: Develop an application that will connect to the server which is controlling the apartment. The app has to be able to connect to smart lock using Bluetooth and open dors on request.
Technologies: Swift, MVVM, BLE
Industry: Consumer Durables

• ViveLaCar — August-2018 - October-2018

Project Description: A simple rent-a-car app with booking system. This was a smaller project, but still fun.
Responsibilities: I had to create an app that will fetch all available cars and implement booking system, as well as connecting to existing API.
Technologies: Swift, SOLID, Alamofire
Industry: Automobile
