SOFT SKILLS

Teamwork, Critical thinking, Problem-solving

PROJECT DETAILS

• Media Meta

Project Description: There is so much to see, explore and watch every day. Every minute there is new news, information, or events. However, we are unable to watch it all. There are hundreds of thousands of channels to explore but due to time, schedule, and priority constraints, we find little time to find and watch our favorite channels. You can watch content from your favorite channels and express your views, comment, or use the Zap and Clap functionality to approve or disapprove any portion of the content you are watching. Media Meta is designed to keep you well informed by bringing you the latest news, trends, and updates continuously.
Responsibilities: I worked as iOS developer and Team Leader for this project.
Technologies: Swift, Objective c
Industry: Social Network

• MyCommunity.Today

Project Description: My Community Today is a comprehensive and disruptive AI based, media/ TV and e-commerce platform that revolutionizes the way businesses engage their customers by combining the most popular social media tools and interactions with streaming video content. My Community application provides daily updates about your immediate neighborhood. At My Community Today, we provide local community with content that is meaningful, entertaining, helpful, and informational. It’s the place to go to find local products, services, deals, and coupons in your immediate neighborhood. MyCommunity.Today offers - Disruptive linear, live, and video on demand streaming, news, and content interactions - Nearby Services in the Neighborhood - Community Hub Business Page and Promotions
Responsibilities: I worked as iOS developer and Team Leader for this project.
Technologies: Swift, Objective c
Industry: Social Network

• Zoom Ride Driver

Project Description: Zoom Ride is the rideshare app you have been waiting for! Zoom Ride has taken the input of many experienced rideshare drivers and developed an app that gives drivers more options, higher earnings, and increased safety and work satisfaction. Currently, the commission based payment structures that are set in place by other rideshare services give the driver zero control over how much of their fare is taken to pay for their use of the company app. This results in driver losing up to 50%+ of their fares in app commissions and booking fees.This structure allows drivers to make up to 50%-70% more than the current rideshare platforms because they can choose each and every day what option will benefit them the most.
Responsibilities: I worked as Sr.iOS developer and Team Leader for this project.
Technologies: Swift, Objective c
Industry: Travel
