Experienced iOS Developer with 11+ years experience in iOS development and a demonstrated history of working in the Insure-tech/E Commence, internet of things industry. Have extensive experience in leading and managing mobile applications developement team Android and iOS both. Excellent experience of SwiftUI,Swift, Objective C, Protocol and Functional programming. Having expertise in frameworks like Cocoa touch, UIKit, Foundation, CoreGraphics, CoreData, Core Animation. Having expertise in design patterns like MVC, MVVM, Delegation, Singleton, protocol design patterns. Also have managed team of Android ans iOS developers for onshore of o"Shore clients. Pro#cient in obtaining requirements from internal and external stakeholders, formulating the requirements into design specs, preparing system speci#cations, assigning tasks to team members, and tracking the progress, code review, maintain releases. Applications are built as native, sometimes enterprise and certainly, they are always felt through the lens of an end user. I care as much about how things look as how they work. Worked as project manager for Enterprise applications android and iOS for general insurance domain for partners and agents. Have worked as system integrations manger for Android and iOS SDK'd building and integrations with vendors. Also worked as product and project manager for automation for health insurance product (COCOCure) for Navi General Insurance (Previously known as DHFL General Insurance).
