Communication, Problem-solving, Teamwork

PROJECT DETAILS

• Neiman Marcus October-2022 - December-2022

Project Description: Neiman Marcus is an American luxury department store that offers a wide range of designer apparel, accessories, and home decor products. Their e-commerce application is an online platform that allows customers to browse and purchase items from the comfort of their own homes. The application is designed to provide a seamless shopping experience with easy navigation, detailed product descriptions, and high-quality images. Customers can also take advantage of features like wishlists, personalized recommendations, and easy checkout options. Overall, the Neiman Marcus e-commerce application is a convenient and efficient way for customers to shop for luxury products online.
Responsibilities: Developing and Mentoring an IOS team for leading eCommerce apps Neiman Marcus. •Engaged in code reviews with the team to brainstorm areas requiring improvement, and validate the design and implementation of features. •Recommended new concepts to enhance the user experience of the applications to provide more options for consumers. •Met with development team members to define technical approaches for established stories and designs
Technologies: swift
Industry: Ecommerce

• Nike January-2023 - April-2023

Project Description: The Nike Retail App is a mobile application that allows users to browse and purchase Nike products directly from their smartphones. The app offers a wide range of Nike products, including shoes, apparel, and accessories. Users can also customize their own shoes using the app's "Nike By You" feature. The app also provides information on upcoming releases and exclusive offers, making it a must-have for any Nike fan. With a user-friendly interface and secure payment options, the Nike Retail App is a convenient and hassle-free way to shop for all your Nike needs.

Responsibilities: Developing and Mentoring an IOS team for leading eCommerce apps Nike. •Engaged in code reviews with the team to brainstorm areas requiring improvement, and validate the design and implementation of features. •Recommended new concepts to enhance the user experience of the applications to provide more options for consumers. •Met with development team members to define technical approaches for established stories and designs
