I have extensive experience in designing and developing native iOS applications using Swift, UIKit, and Xcode. I received my Post Graduate Diploma in Mobile Computing from the Centre for Development of Advanced Computing, Bangalore, and have 7+ years of experience in mobile application development. In my previous roles, I worked on the start-to-end development of iOS applications. I have worked with early-stage startups which gave me the exposure to develop applications from scratch. I have experience working with third-party libraries like Alamofire, Firebase, SwityJson, and others. In my role at Jet2Travel technologies, I was responsible for integrating the Azure CI/CD pipeline for the mobile teams. For a short tenure, I have worked on the development of the Apple watch application too. I feel that my experience with iOS application development would be of great benefit to your organization, and would also help me with a learning growth trajectory in my software development career. Looking forward to working with you.

INDUSTRIES: Health and Fitness, Travel

TECHNICAL SKILLS

- iOS — 7 years & 4 months

PROJECT DETAILS

- Fittr — November-2018 - November-2020

Project Description: Fittr is an application for managing health and fitness goals.
Responsibilities: Develop modules individually, release the application to the app store, and track user engagements and crashes.
Technologies: Swift, Xcode, Alamofire, SwiftyJson
Industry: Health and Fitness
