• Retailio February-2021 - January-2023

Project Description: Retailio is a resourceful app that is creating a high digital impact on the supply chain management of the Pharma industry across India. Retailio offers a great platform from where Chemists, Retailers, Distributors, Pharmacists & Hospitals can place their orders with their respective distributors through Retailio mobile application and web interface. Users can search for required products such as medicines, surgical products, life-saving drugs, and critical vaccines along with other pharma products, and place orders smoothly. Users can experience the all-new digital platform for searching for products and placing orders online with the least effort. Chemists receive their orders with no hassle and get them delivered to their stores.

Responsibilities: 1. Responsible for managing the overall development life cycle of iOS applications. 2. Working with a cross-functional team consisting of Backend Engineers, app developers (iOS, Android), SDET, Product Managers, and Product designers. 3. Plan and track the development and release schedules. 4. Responsible for driving good coding practices in the team like good quality code, documentation, timely bug fixing, etc. 5. Report on the status of development, quality, operations, and system performance to management.

• Holofy April-2020 - February-2021

Project Description: Holofy is a video-powered sales engagement platform that streamlines the entire conversion funnel for real-estate businesses that want to close more deals remotely. #proptech #realestate #realtor #saas #videotour #CRM Our video-first experience embeds seamlessly onto your website or marketplaces such as Rightmove, Zoopla, Zillow, and more. Video converts on average up to 2.5x more viewers to leads, and at a higher quality than any other digital viewing technology. Our dedicated app enables agents to effortlessly capture critical lead metrics and interests, enabling a data-driven sales process that is exponentially more efficient. Last but not least, leads can place remote offers for the spaces they love through fully customizable application forms with built-in payment processing. Remote offers dramatically reduce the time it takes to close a committed client, and our bidding system extracts on average 12% better yields than listings without Holofy.

Responsibilities: 1. Responsible for managing the overall development life cycle of iOS applications. 2. Working with a cross-functional team consisting of Backend Engineers, app developers (iOS, Android), SDET, Product Managers, and Product designers. 3. Plan and track the development and release schedules. 4. Responsible for driving good coding practices in the team like good quality code, documentation, timely bug fixing, etc. 5. Report on the status of development, quality, operations, and system performance to management.
