A journey that started in August 2019 as a Software Developer is still in progress and there is a long way to go. I believe in trying new things rather than sticking to the stuff that I already know since innovation is the key here. Software development is a team game and I always try to make myself more efficient and compatible with my team members. I'm passionate about developing readable, clean, maintainable source code and delivering a quality product.

**INDUSTRIES:** Social Network, Information Technology, Software and Platforms

• PSB App December-2022 - August-2023

Project Description: PSB Headphones unlocks the full potential of your Bluetooth® headphones from PSB Speakers. ACCESS & CONTROL The app turns your device into a remote control for your premium headphones, giving you access to specific sound settings and features that you can adjust for a richer listening experience. PERSONAL SOUND BY AUDIODO™ Audiodo Personal Sound is the leading solution in personalized audio. The Headphones Control app features a step-by-step hearing calibration experience that tailors sound to perfectly fit your hearing. UPDATES & INFO Find battery status, current codec, product manuals, and available devices within the app. Let the app prompt you when a software update is available for your PSB headphones.

Responsibilities: Lenbrook is one of Canadian largest speakers and headphone company. I am currently serving as the team leader for the PSB Headphone Project, overseeing a team of six individuals focused on iOS, Android, and firmware development, directly interacting with clients. Currently, efforts are underway to seamlessly integrate state-of-the-art wireless headphones, both in-ear and over-ear, into the PSB App.

Technologies: CoreBluetooth, BLE(Bluetooth Low Energy), UIKit, CTKD(Cross Transport Key Derivation), Qualcomm

Industry: Information Technology
