A proficient software developer with expertise in mobile technologies, particularly in the latest iOS development technologies. Places a strong emphasis on maintaining clean code and ensuring good code quality. Experience in working with the latest iOS trends such as SwiftUI, and always eager to learn new technologies to stay up-to-date in this fast-evolving industry.

INDUSTRIES: Education, Ecommerce, Information Technology

TECHNICAL SKILLS

• SwiftUI	2 years
• Bitbucket	2 years
• GitHub	2 years
• Unit Testing	2 years
• Git	2 years
• Version control	2 years
• Xcode	2 years
• MVVM	2 years
• Swift	2 years
• Code Review	2 years
• Combine Framework	1 years
• Swift Package Manager	1 years

SOFT SKILLS

Communication, Adaptability, Teamwork, Problem-solving, self-Motivated, self-Confident

PROJECT DETAILS

• Learning App July-2022 - March-2023

Project Description: A Swift Package was developed for the learning feature in client side, allowing users in the Chiness market to learn new skills by completing courses, tracking their progress, exploring new courses, and marking them as favourites, among other features. The project was built using SwiftUI and MVVM architecture. In this project, I contributed to adding new features and maintaining the iOS application. The team size was approximately 20-25 individuals.
Responsibilities: The project is to build Swift Package for a USA Fortune 500 client which further can be used in a different app for the same client. The package which was built using SwiftUI + MVVM architecture can further be used in a different way which was based on UIKit + VIPER architecture. Working closely with the UI/UX team to understand the requirement. And with the back-end and QA team to enhance the performance. Working with 3 lead iOS developers with 8+ years of experience.
Technologies: SwiftUI, Swift, MVVM
Industry: Education

• Retail App for APAC January-2022 - June-2022

Project Description: The Retail App for APAC app was developed and launched for the APAC market, enabling daily operations management and monitoring for client Companies. The app provided real-time information about the latest brands, consumers, and trends, and engaged with operational workflows to ensure process efficiency. The development team consisted of around 10-12 individuals and my contribution to the project was building a feature from scratch as an iOS developer.

Responsibilities: An enterprise app for the Asia-Pacific(APAC) region for one of the USA Fortune 500 clients. Published multiple versions of the app to the App Store as a solo contributor from the iOS front. Reused the code for both iPhone and iPad platforms and modified the single code base so that it can be used for different types of users using SwiftUI + MVVM architecture. We worked closely with the QA team to improve the app's performance.

Technologies: SwiftUI, Swift, MVVM

Industry: Ecommerce

• Native iOS Baseline App June-2021 - December-2021

Project Description: As part of a team of around 8-10 individuals, we worked on a baseline application for USA client apps, focusing on foundational elements. I contributed by adding many foundational elements to the app, creating baseline code with common capabilities, and creating components out of it. The project aimed to establish a solid base for Client apps, allowing for future app development and expansion.

Responsibilities: I worked on a baseline app from start to end during phase 1. which was built for one of the USA Fortune 500 clients. Integrated lots of 3rd party SDKs to the baseline, based on which 19+ applications were to be built. One of the 1st projects in the company was built using SwiftUI + MVVM architecture. I worked with and mentored by a lead iOS developer with 6+ years of experience during the project.

Technologies: SwiftUI, Swift, MVVM

Industry: Information Technology

EMPLOYMENT HISTORY

• Member of Technical Staff

Description: Collaborated with product managers to analyze requirements and groom user stories, ensuring that project goals and deadlines were met. o Worked with UX and creative teams to translate designs into high-quality App experiences that were both aesthetically pleasing and user-friendly. o Reviewed pull requests and ensured better code quality standards for the team. o Mentored fresh grads to improve their skills and collaborate effectively within the team. o Developed Apps using next-gen iOS capabilities such as SwiftUI, Combine. o Utilized core iOS components including SwiftUI, SPM to build, maintain, and optimize components for reusability across a wide range of iOS devices. o Integrated Mobile Backend as a Service (MBaaS) platforms, SDKs, and APIs such as Google Firebase. o Worked with external data sources and APIs using REST, Alamofire to create seamless and efficient user experiences.

EDUCATION

• Bachelors degree in EnTC from Pune University 2017 - 2021

LANGUAGES

• English - advanced
