• MY MD — May-2021 - January-2023

Project Description: myMD enables patients to take charge of their health. They can monitor their day-to-day activities, request care, keep track of their vital readings like blood pressure, heart rate etc., request assistance from their care community, manage their medications and connect to the care provider network through secure multi-party video calls. Physicians, home care companies, and care managers around the world use the mobile functionality of our app to keep an eye on their patients, monitor them, keep them engaged and always be available through telehealth, messaging, and instant video calls. Our App is an extension of our web platform, bringing mobile functionality into your care initiatives.
Responsibilities: Design and Development, Enhanced new functionality and bug fixing
Technologies: Swift
Industry: Healthcare
