EMPLOYMENT HISTORY

• Senior iOS Engineer

Description: • Architected the IVSFramework wrapper framework that leveraged an internal Objective-C framework for digital-KYC; improved API response time by 80% and reduced manual errors by 15%. • Implemented public key cryptography to secure the image data of user's face and document; reduced potential data breaches. • Implemented a facial recognition algorithm that retries face detection for up to n times; increased face detection accuracy and reduced false positives.

• iOS Engineer December-2018 - March-2022

e-Jan Networks

Description: • Automated code standardization and improved code quality by enforcing Swiftlint on the codebase; reduced code review time by 45% • Collaborated with the product team to develop a POC using Flutter to build a new feature for the app. • Streamlined the crash detection process by integrating Firebase crashlytics into the development life cycle; reduced the time to detect and fix crashes by 75%.

EDUCATION

• Bachelors degree in IT from Rayat & Bahra 2012 - 2016

LANGUAGES

• English - native
