Teamwork, Problem-solving, Time management

PROJECT DETAILS

• ScheduleManager 2.0

Project Description: ScheduleManger 2.0 is an enterprise application used in-store to manage the daily shifts of employees with details like shift timing, which job they are doing at which time, breaks timing and check-in and out timing. It also has a dashboard graph summary to show data like how many employees currently working on a specific job or going to work on which job in the next half an hour, how many employees are on a lunch break or going to be on lunch break in the next half an hour, how many employees are late for check-in, late for lunch or late from lunch. It's a real-time application using Socket.
Responsibilities: Work with a project manager to provide an estimation of changes or new functionality and status updates of the project. Design and manage UI components using SwiftUI. Lead a team of 3 members and help them in the development or technical understanding of new changes or improvements. Write Unit and UI test cases for each change or new feature we implement. Perform code review for each PR change.
Technologies: Swift, SwiftUI, RestAPI, MVVM
Industry: Information Technology

• CEM - Enterprise CRM app for The Hour Glass

Project Description: CEM is an enterprise sugar CRM iOS application developed in Swift for THG (The Hour Glass). It is used to view, add and update prospect and client details. It is also used to maintain transactions and repair details of products. We are managing inventory details also in the application.
Responsibilities: Work with the manager to provide an estimation of changes or new functionality and status updates of the project. Design and manage UI components using Swift and UIKit. Write technical documents, user guides and support documentation. Perform weekly code reviews of working projects.
Technologies: Swift, UIKit, SugarCRM RestAPI, Firebase, MVVM.
Industry: Enterprise

EMPLOYMENT HISTORY

• Lead iOS Developer
