My experience as a Developer includes working with iOS applications by integrating them with different platforms using an assortment of protocols that make me perfect for your job. I am having good experience and knowledge in Swift and Objective C for 10 years. I have previously worked on many app development projects requiring extensive detailing.

INDUSTRIES: Social Network, IOT

TECHNICAL SKILLS

• ObjectiveC	5 years
• Swift	5 years
• Internet of Things (IoT)	2 years
• SwiftUI	1 years
• React Native	1 years

SOFT SKILLS

Problem-solving, Critical thinking, Teamwork, Communication

PROJECT DETAILS

• SOCIAL MEDIA APP — December-2018 - July-2019

Project Description: Specification: • Application with social media integration for login, registration and manage the user profile. • User can able to create post with add photo from gallery to take photo from camera. Also user can add video from gallery and can able to crop the video using the third party library. • App include all feature that a social media app have in the application like like post, comment, chat or share post in the app or other social media application like WhatsApp or Facebook.
Responsibilities: Take over the responsibility of sole development of the application, updates of the application, new feature integration, and communicate with clients with update and change requests. Unit testing and upload on the app store.
Technologies: Swift
Industry: Social Network

• BLE CONNECTIVITY — December-2021 - August-2022

Project Description: Specification: • Create POC for the BLE connection with mobile application using the oximeter which enables to read the oxygen level of oximeter to mobile application. To achieve this we have implemented the coreBluetooth framework which connect the oximeter with mobile app via bluetooth. • Create separate component for the BLE Manager which has all required methods which is used in the application for the connection with any BLE device to any application such as connection with app, perform read command and write command as per the requirement of the firmware implemented in the BLE device. • Implement the GATT protocol as per the firmware requirements.
Responsibilities: Develop the application from scratch to the end. Understanding of Requirements, Create a proof of concept for a client. Design integration, development, and communication with firmware developer.
Technologies: Swift
Industry: IOT

EMPLOYMENT HISTORY

- SR SOFTWARE ENGINEER — December-2018 - August-2022
- SR IOS DEVELOPER — January-2015 - November-2018

Uplers

- SR IOS DEVELOPER — November-2023 - June-2015

AQe Infoways pvt ltd

- IOS DEVELOPER — March-2013 - September-2013

Agile Infoways pvt ltd

EDUCATION

- Masters degree in Computer Engineer from University of Hertfordshire — 2022 - 2023
- Masters degree in Computer Application from Gujarat University — 2008 - 2011

LANGUAGES

- English - advanced
